The Berman Institute-North American Jewish Data Bank at the University of Connecticut is hosted by the Center for Judaic Studies and Contemporary Jewish Life in partnership with the Roper Center for Public Opinion Research, with the support of The Jewish Federations of North America (JFNA)

Pocket Demographics: US Jewish Population

The Berman Institute-North American Jewish Data Bank (NAJDB) is the central repository of social scientific studies of North American Jewry. The Data Bank's primary functions are to (1) acquire, archive, and disseminate quantitative data sets and reports, both contemporary and historical, and (2) encourage utilization of the archive. Our goal is to aid in understanding North American Jewish communities and to improve the quality and utilization of research conducted about North American Jewry.

Who Counts as a Jew:

Representing about 2% of the total US population, American Jews are a "rare population." Therefore, each study of them has presented researchers with unique and interesting challenges. Variations among the estimates presented here are the result of different definitions and methodologies, as well as the auspices under which a given study was conducted.
