

Berman Jewish DataBank highlights new materials added to archives

April 7, 2016

The Berman Jewish DataBank invites its stakeholders to explore a range of new materials that have been added to our archives recently:

- The [2014 Demographic and Attitudinal Survey of the Jewish Population of New Mexico](#), commissioned by the Jewish Federation of New Mexico and conducted by Marina Arbetman-Rabinowitz and Benjamin Kupersmit. This is the first-ever Jewish community study in New Mexico.
- A 2015 [J Street poll on the U.S.-Iran nuclear agreement](#), which joins a [2015 Jewish Journal poll](#) on the same topic.
- The [2016 American Muslim Poll](#) with comparisons to American Jews, Catholics and Protestants. The poll was sponsored by the Institute for Social Policy and Understanding and overseen by principal investigators Dalia Mogahed and Fouad Pervez.
- The American Jewish Committee's [2015 Annual Survey of American Jewish Opinion](#). Seventeen [AJC annual surveys](#) dating from 1998 are available at the DataBank.
- Slides decks comparing study results from communities served by [small and intermediate size Jewish Federations](#), prepared by the DataBank. Separate decks focus on social, demographic and economic characteristics, Jewish connections, and human and social service needs.

- Reports on Holocaust survivors living in [Canada](#) and specifically in [Montreal](#) and [Toronto](#), prepared by Charles Shahaar from the 2011 Canadian Household Survey. The reports were sponsored by the Jewish Federations of Canada-UJA, Federation CJA, and UJA Federation of Greater Toronto.
- The [2014 Survey of AJS \(Association for Jewish Studies\) Members](#), commissioned by the AJS with funding from the American Academy of Jewish Research and conducted by Steven M. Cohen.

In addition, we have added study pages with links to three recent Pew Research Center studies:

- [The Future of World Religions: Population Growth Projections, 2010-2050](#)
- [Israel's Religiously Divided Society](#) (a 2014-15 survey of the Israeli population)
- [The U.S. Religious Landscape Study 2014](#)

The [Berman Jewish DataBank @ The Jewish Federations of North America](#) is the central online address for quantitative studies of North American Jewry and information about world Jewish populations. We proudly collaborate with the [Berman Jewish Policy Archive](#) and the [Center for Judaic Studies and Contemporary Jewish Life at the University of Connecticut](#) in offering open access to more than 375 national, local and topical studies, reports, and resources. The DataBank is funded through a generous endowment from the [Berman Foundation](#). We extend our gratitude to commissioning organizations, researchers and others whose cooperation in providing materials makes our work possible.
